*CREATE
THE FUTURE*

WHO WE ARE

We are a group of dreamers and doers. A group that believes the power of we over the power of *me*. A group of curious and tenacious people who are impassioned by the discussion of a genius idea. And the power to make it happen. We are the ones who are looking to write the future. And we're seeking those who are brave enough to write it with us.

WHAT WILL YOUR IMPACT BE?

We understand that there is no “one size fits all” for those who need help. We've committed our practice to helping find each patient the best possible outcome from the burden of mental health illness and help get them back to enjoying life. We work with patients on comprehensive, compassionate treatment plans, including psychedelic assisted treatments as we are hyper-focused on transforming mental health care to give each patient a positive mental wellbeing.

* Based on the pivotal trial for treatment of depression in the clinical setting, which used esketamine with an antidepressant, about 70% of patients have at least a 50% reduction in symptoms and about 50% of patients have complete remission of symptoms.

JOIN US TO TREAT

We understand the importance of the continual advancement in the treatment mental illness. Being one of the very first to practice TMS in 2008, at our core, we are a group that believes in the research that provides innovative and groundbreaking treatments for our clients. We are first in line with psychedelic assisted treatments as we are determined to continually be innovating to help each and every person who is suffering with the burden of mental illness.

Tenacious in practice and curious at heart, we push to keep evolving solutions in order to advance our capabilities with the most innovative, effective, non-invasive and evidence-based therapies available.

We actively explore new therapies and new paths for patient and peer education. We seek new research opportunities and new ways to make our practice more effective. We benchmark all processes thoroughly to ensure consistent, high-quality outcomes and contribute to the growing body of knowledge about brain health therapies.

Those Who Can Envision the Future Are the Ones to Create It.

JOIN US TO **FOCUS**

You chose this career to help people overcome the emotional challenges of mental illness and we believe your focus should remain there. No backoffice work, no scheduling, no dealing with insurance companies, just concentrating on the mental wellbeing of each of your patients.

JOIN US TO **GROW**

Come here to grow, learn, explore and expand what's possible. We support your professional development with continuing education, and the programs you want to engineer and the studies you want to pursue. When you grow, we grow. Together, our clinicians and staff cultivate a culture of respect, creativity, and collaboration that encourages innovative solutions and pioneering behavior.

Professional Development

A generous CME reimbursement for continuing education, focus on new program development, along with training and lecture series.

Collaborative Environment

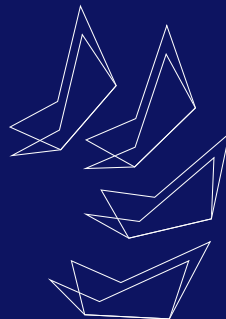

Case conferences across clinics provides collaboration with physicians as well as a core care team including therapists.

Work with the Best

Work with the physicians literally writing the books and programs on ECT and psychedelics.

Have a specialized interest or a curiosity you want to explore? We are here to make sure you're able to pursue it. We will work with you to build on every idea you have to help cure mental illness.

Let's Create the Future Together.
